WYNDMUIR PROPERTY OWNERS' ASSOCIATION TREE REMOVALS

August 29, 2022

Dear Owners,

Over the last eighteen months, it was noted that the Locust trees on Norwich Court have become a nuisance with the numerous seed pods that are dropped on the street and lawns.

The Board of Directors has investigated the possibility of trimming, different treatments and injections to the trees to reduce the seed pods. There is no guarantee on any of the treatments to reduce the seed pods.

The Board of Directors has decided to remove and replace nine Locust trees on Norwich Court this fall. The trees have been marked with white ribbon.

The City of Crystal Lake had provided a list of trees that are approved to be planted street-side. The tree company was asked to provide pricing and a recommendation of what trees would be best for the area.

Possible replacements would be:

- a) Linden Tree
- b) Hackberry Tree
- c) Maple Edge
- d) Sugar Maple

If you have any questions or concerns, please contact Leanne Eveland at Northwest Property Management. You can email to: LeanneE@nwprop.com.

Sincerely,

Board of Directors
Wyndmuir Property Owners' Association
and Northwest Property Management
